Software Engineer with hands-on experience building and maintaining modern web applications across frontend and backend systems using TypeScript, JavaScript, React.js, Next.js, ElysiaJS, MongoDB, Docker, and AWS. Contributed to public-facing digital services at GovTech Malaysia by developing interactive UI components, REST APIs, document management features, system integrations, and backend services. Experienced in Agile development, API integration, debugging, testing, cloud deployment, and building maintainable software aligned with technical and business requirements.

WORK EXPERIENCE

GovTech Malaysia – Software Engineer ***Aug 2025 – Present***

- Developed and maintained public-facing government platforms (MYDS, RDMKD, Sekolahku, i-PPA, MyFaSA, GovSuite DMS) using React.js, Next.js, Fastify, ElysiaJS, Laravel, MongoDB, Docker, and AWS.
- Built responsive, accessible, and reusable UI components based on Figma designs, ensuring compliance with the Malaysian Government Design System (MYDS) and government digital standards.
- Integrated frontend applications with REST APIs for data display and management across multiple systems.
- Contributed to backend architecture improvements, including MVC standardization, automated API testing, technical research (spikes), and quality assurance through Postman and integration testing.
- Identified and resolved frontend and backend defects, enhancing system stability, maintainability, and alignment with Business Requirement Specifications (BRS).
- Collaborated in Agile (Scrum) teams, participating in sprint planning, code reviews, Git workflows, testing, cloud deployment, and software engineering best practices.
- Tech Stack: TypeScript, React.js, Next.js, Fastify, ElysiaJS, Laravel, Tailwind CSS, AWS, REST APIs, Git

Hallucinations Digital – Freelance Frontend Developer ***June 2026 – Present***

- Developed and maintained the Super Admin dashboard for the Guardina Web platform using React.js, TypeScript, and Tailwind CSS.
- Built responsive and reusable user management, partnership management, and news management interfaces based on Figma designs.
- Integrated frontend components with REST APIs to support CRUD operations, data visualization, filtering, and administrative workflows.
- Implemented dashboard features including user administration, partnership oversight, content management, and analytics displays.
- Collaborated with designers and backend developers to deliver scalable, maintainable, and user-friendly administrative tools.
- Tech Stack: React.js, TypeScript, Tailwind CSS, REST APIs, Git

Avialite Sdn Bhd – Embedded Software Engineer ***Jan 2025 – Jul 2025***

- Contributed to R&D efforts for embedded systems in aviation lighting products, assisting in prototyping and feature validation.
- Developed and tested embedded firmware in C/C++ for microcontroller-based systems, focusing on correct functionality and reliability.
- Assisted in integrating firmware with hardware components, working closely with hardware engineers to debug and validate system behavior.
- Supported improvements to existing firmware by fixing bugs and making small enhancements to code structure and performance.
- Tech Stack: C, C++

PROJECT EXPERIENCE

GOVSUITEDMS – Government Document Management System

- Developed and maintained RESTful APIs and MongoDB data models for document management, folder management, search functionality, and system integrations.
- Implemented document search features and optimized data retrieval to improve system performance and user experience.
- Integrated backend services with frontend applications, RabbitMQ, and data processing systems to support document workflows and processing.

MYDS - Malaysia Design System

- Developed and enhanced reusable UI components aligned with MYDS standards.
- Standardized components to comply with SPLaSK policies and improve cross-platform consistency.
- Created structured documentation to support adoption by internal development teams.

RDMKD – Repositori Data dan Maklumat Kementerian Digital

- Resolved UI and functional issues to ensure alignment with Figma designs and business requirements (BRS).
- Implemented MYDS-compliant components to maintain a consistent design system across the platform.
- Improved user experience by refining layouts, styling, and interaction behavior.

SEKOLAHKU – National School Information System

- Contributed to a decoupled architecture using React (frontend), Fastify (API), and a headless CMS for scalability.
- Implemented data fetching and dynamic UI components based on Figma specifications.
- Fixed UI and functional bugs to ensure smooth user flows and system reliability.

MyFaSA – Public Sector Facility Booking System

- Developed and maintained admin dashboard features using Laravel and Blade for a public sector facility booking and management platform.
- Built responsive dashboard pages and UI components based on Figma designs, ensuring a consistent and user-friendly experience.
- Integrated frontend views with backend controllers to display and manage facility and user information.

- Collaborated with backend developers to implement facility approval and administrative workflows

EDUCATIONAL BACKGROUND

International Islamic University Malaysia (IIUM) ***Oct 2020 – Aug 2024***
Bachelor of Science (Physics – Computational Physics)(Honours) **CGPA: 3.94/4.00**

- Best Student (Overall) of Kulliyyah of Science
- Final Year Project: Development and Application of High-Resolution CNN in UAV Detection

Centre for Foundation Studies, IIUM ***Jun 2019 – Jul 2020***
Foundation in Physical Science **CGPA: 3.98/4.00**

SKILLS

- **Programming Languages:** Typescript, JavaScript, HTML/CSS, C, C++, Python *(basic)*, PHP *(basic)*
- **Libraries & Frameworks:** React.js, Tailwind CSS, Next.js, ElysiaJS, Laravel, Node.js *(basic)*
- **Tools & Platforms:** Git, GitHub, Docker, Postman, AWS *(basic)*, Proxmox VE, Visual Studio Code, Arduino IDE, STM32CubeIDE
- **Design Systems:** MYDS (Malaysian Design System)
- **Databases:** MySQL, MongoDB

LICENCES & CERTIFICATIONS

- **A Complete Course on an IoT System - Design and Development | Udemy** ***Feb 2025***
- **CompTIA Security+ | CompTIA** ***Dec 2024***
